Training for peak sporting organisations and clubs

eSafety offers online safety presentations for peak sporting organisations and clubs interacting with young people.

Our online safety experts provide this training for administrators, coaches and managers, subject to availability. It is not for players or anyone under the age of 18 years.

Participants will learn about:

- current trends in social media use, particularly in sporting environments
- the importance of having a social media policy and how these policies relate to existing codes of behaviour, member protection and club/organisation policies.
- safeguarding all members of your organisation and key online safety messages to share with their sporting community.

These presentations are usually delivered online. They are one hour long.

For more information visit [Training and presentations FAQ](#).
